## **DETAILED ACTION**

As per amendment filed on May 9, 2005, applicant has cancelled claim 10.

## **Reasons for Allowance**

Claims 1-9 are allowed.

This is examiner's statement of reasons for allowance.

The instant invention recites an image reading apparatus comprising:

a light source for emitting light which illuminates a photographic material;

an image sensor which reads an image recorded on the photographic material by dividing the image into a plurality of pixels and separating each of the plurality of pixels into a plurality of colors, and outputs data of the plurality of colors;

acquiring device for acquiring information representing a type of the photographic material; and

an optical filter device which is disposed between said light source and said image sensor and sets a color correction state of a color balance of transmitted light in accordance with the information representing the type of the photographic material so that outputs for the plurality of colors from said image sensor are substantially equal.

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
